

DAYStrip[®] Stripping System

Flat or Shaped Surface

New!

Long life, high stripping force, and solid quality make DAYStrip the ideal stripper. Three different sizes are available to fit most Dayton Progress retainers. DAYStrip strippers can be ordered semifinished (blanks) to be finished by customer.

Superior Holding Strength

Durable
Self-contained

DAYStrip[®]

Stripper Insert with Part Surface

Contoured stripper inserts are available in lengths of 35 and 45 mm.

The insert is manufactured to specifications in your CAD file or drawing/print.

The maximum angle is 15°.

Note the minimum lengths.

Assemblies & Ordering Information

Ball Lock

All angles are defined for reflected views of the punch. The head flat of the DAYStrip aligns with the ball seat. If a different angle is defined, the outer shape of the bronze-graphite insert rotates with the shape.

A rotation of the cutting shape to the outer shape of the bronze-graphite insert can be ordered as a special item based on your drawing or print. Standard angles are available in 15° steps. Intermediate angles are also possible.

HOW TO ORDER

Example:
DAYStrip: UBGCA 16 C81 P6.0 W5.5 A2 B1 PP2.57 WW2.5 X2 90° L2 22

Press Fit

All angles are defined for reflected views of the punch. The head flat of the DAYStrip is 90° to the key flat of the punch. If a different angle is defined, the outer shape of the bronze-graphite insert rotates with the shape.

A rotation of the cutting shape to the outer shape of the bronze-graphite insert can be ordered as a special item based on your drawing or print. Standard angles are available in 15° steps. Intermediate angles are also possible.
