# DAYComp Composite Materials

## Technical Specifications

### Extended Tool Life

The material's low friction prevents dust buildup, reducing wear and extending component lifespan.

### Lower Maintenance & Repair Costs

Durable composites reduce downtime, cutting maintenance and operating costs.

### Exceptional Performance

DAYComp composites excel as guide and sliding elements, even in tough conditions.

### Total Cost of Ownership

DAYComp's longer lifespan requires less frequent replacements, significantly lowering total cost of ownership.

### Cost efficiency with DAYComp

DAYComp sliding plates are suitable as sliding partners for unhardened steel or cast iron. This enables a significant cost reduction for new productions.
