Re: Confirmation that Products from Dayton Progress Meet Requirements for the REACH SVHC List now at total of 209 as of June 25, 2020

This Letter is to serve the purpose of confirmation that Products from Dayton Progress are in full compliance with the REACH SVHC List of Substances of Very High Concern contained in articles above the threshold 0.1% w/w manufactured and marketed in the EU (Legal Reference EC 1907/2006). This is an update to reflect the four additional substances added on June 25, 2020. This expands the total list to 209 substances.

The four new substances added June 25, 2020 are all associated with either polymer or plastic type products; catalysts in coating products; or additives in cosmetics, personal care products and pharmaceuticals. Dayton Progress does not produce any of these type products and therefore does not use these substances.
