### Faster, more dependable delivery

Dayton's FDS service—a unique Dayton customer benefit since 1957—is the best delivery service in the industry.

Our turnaround times are quicker, and our delivery is consistent: You can depend on it.

### One day delivery on most commonly used products

Using our standard FDS delivery service (see chart on right), you can order products to accommodate JIT (just-in-time) manufacturing schedules—helping increase productivity and keeping inventory levels low.

Using our emergency delivery services (see the “NIN” and “SOS” charts on the right), we can provide same or one-day shipment on many products in sufficient quantities to meet critical last-minute production schedule changes.

### “FDS or Free!” on NIN (Need-It-Now) orders

All NIN orders are shipped same day, or shipping and product costs are free. Our promise: “If we fail to meet our NIN FDS schedule for any reason—regardless of the specified time or number of products—all items shown on that order are shipped FREE of charge.” No questions. No hassles. It's free.

Note: FDS refers to the number of working days to shipment, following receipt of your order. (The day of receipt is not counted as a working day.) Dayton Progress will make split shipments of all orders containing specials. Standard items will be shipped per FDS. Specials will be shipped separately per an acknowledged copy.
